Double Click the certificate in File Explorer

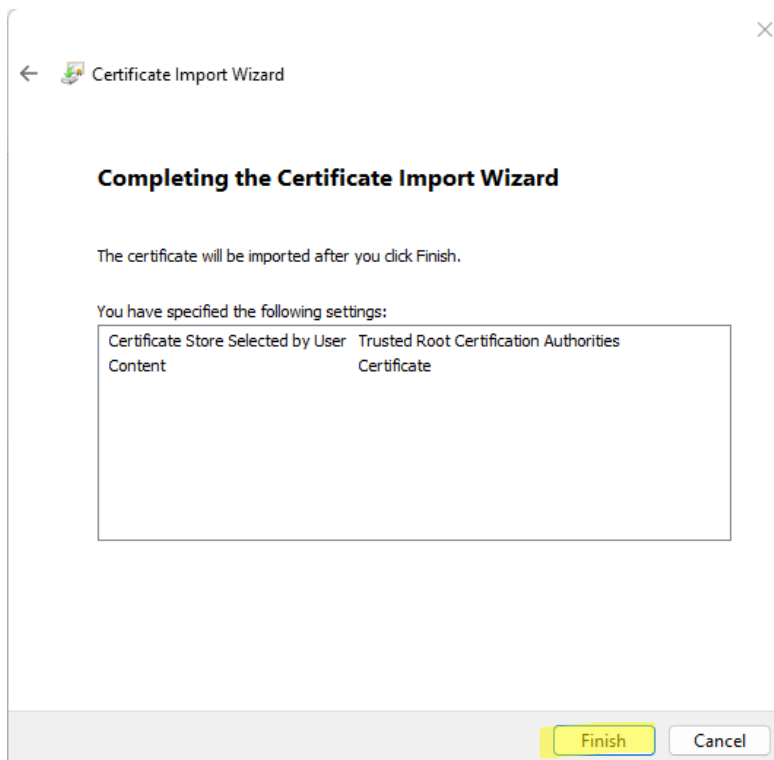

Click on Install Certificate

Leave the radio button on the Current User selection and click Next

Click on the Place Certificates in the following store radio button, click Browse, in the pop up window, choose Trusted Root Certificate Authorities, then click OK

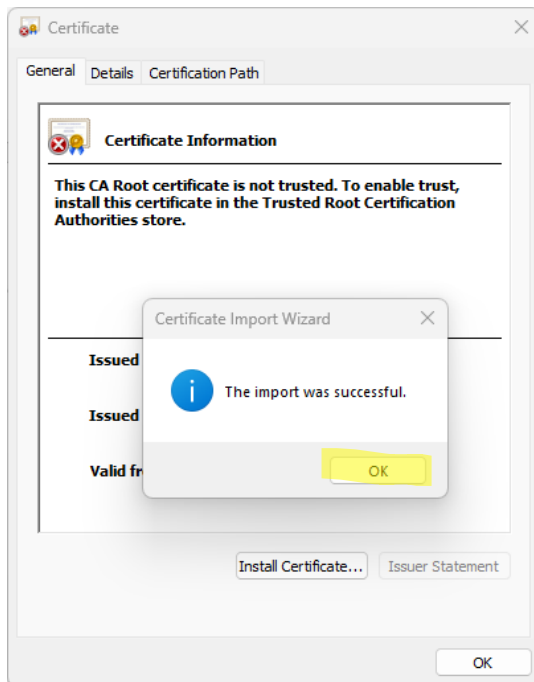

Click on Next to continue

Click on Finish to complete the import

Click Yes if you get a warning – This is just advising that the certificate isn't signed and it's origin

Click OK to finish all import tasks, you can click OK on the certificate
